

UX1 Chosen as “Best Product” in Spain

Jury of Construction Companies and Our Customers

Daikin's split type UX1 series has been awarded a prize as the best product in the climate control category in the 1st staging of Spain's *NAN Arquitectura y Construccion Awards*. The awards ceremony was held in Madrid on November 28th, 2007. Jesus Valiente, Deputy Commercial Director of Daikin AC Spain S.A. (DACS), along with Jesus Maria Martinez, from the DACS Sales Management dept. represented Daikin at the event. The General Director of SMEs for Telefonica S.A., the global telecommunications giant and sponsor of these awards, presented the prize.

TPI Edita, publisher of the magazine *NAN Arquitectura y Construccion*, promoted the award. The company has a positive reputation in the industry and acknowledges the quality, innovation, and prestige of the materials, products, tools, machinery and services used in construction.

More than 200 companies with approximately 350 products participated in the 1st edition of the awards. The awards were presented in 11 different categories: insulation, carpentry, locksmithy, climate control, electricity, structures, installations, water and swimming pools, machinery, paving, sanitary installations and other areas. There was also a special prize for architectural management.

The jury, led by Carlos Hernandez Pezzi, President of the Higher Council of Spanish Colleges of Architects, was composed of representatives from Spain's 6 largest building corporations, including the ACS Group, FCC Construccion, the Acciona Group, the Ferrovial Group, the OHL Group and Sacyr-Vallehermoso.

Innovation in the Field of Climate Control

The UX1 series is a split type heat pump that uses R410A with a wall-mounted type indoor unit. The series combines high efficiency with a modern design. The indoor unit with its elegant appearance is compact at 150 mm in depth and is available in 2 colors, mat crystal white and mat crystal silver. The series currently includes models with capacities of 2.5 and 3.5 kW, to which a new 5.0 kW model may soon be added for the combination with multi-split type.

The series' most outstanding feature is much higher energy efficiency compared to previous models. By applying Daikin's DC Inverter and advanced technology, UX1 series makes it possible

to offer large capacity along with low power consumption.

In addition, the Titanium Apatite Photocatalytic Air-Purifying Filter helps to provide excellent indoor air quality. The filter decomposes odors and removes bacteria and also collects dust and pollen. Of course, the series also includes well-established functions such as Intelligent Eye, Indoor/Outdoor Unit Quiet Operation, Home Leave Operation, Program Dry Function and the 24-hour On/Off Timer, etc.
